- \_\_\_ FeLV vaccine for at risk cats
- \_\_\_ Check fecal sample \_\_\_\_\_
- \_\_\_ De-worming medication
- \_\_\_ Dental exam

## 4-6 Months \_\_\_\_\_

- \_\_\_ Spay or Neuter
- \_\_\_ Presurgical Bloodwork

**Please remember that this is a wellness schedule and, if your pet ever becomes ill, additional tests and diagnostics will be necessary.**

**75-85% of pets over the age of 3 have dental disease!** Dogs and cats are not supposed to have bad breath because they do not brush their teeth. Brushing your pet's teeth is beneficial for both your pet and your pocketbook. Advanced dental disease can be costly, not to mention painful to your pet. If you are unable to brush your pet's teeth daily, consider having a dental cleaning performed on your pet once a year.

### “Senior at Seven”

Pets don't age the way people do—they age much faster. Most pets are considered seniors at seven years of age. Be sure to visit your veterinarian regularly.

## 1-4 Years \_\_\_\_\_

- \_\_\_ Comprehensive physical exam
- \_\_\_ Weight \_\_\_\_\_
- \_\_\_ Body condition score \_\_\_\_\_
- \_\_\_ Nutritional assessment
- \_\_\_ FDVCR and Rabies vaccine
- \_\_\_ FeLV/FIV Test
